DETAILED ACTION

1. Applicants' response to the office action and amendment filed on September 16, 2004 have been entered and considered.

2. The following is an examiner's statement of reasons for allowance:

Claims 2, 4, 6-20 are allowed.

The present invention is drawn to a biochemical sensor system with molecular amplification of a signal and analyzing a biological entity in a biotic medium characterized in that the compounds allowing scaffold to be formed are selected from among an antibody modified by a nucleotide, or one of its fragments, DNA dendrimers of suitable size and metal or semiconductor nanocrystalline compound colloids. The closest prior art teach a biochemical biosensor for detection of a biological entity and did not teach or suggest the scaffold formation comprising said compounds as reflected by the instant amended claims. Thus the instant invention was not taught or obvious over the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
